

# 5 Secrets Evolutionists Don't Want You to Know

Learn how to find the truth...

## 1. Evolution is Not a Fact

### • How do we know this?

- Lack of evidence...Life did not come out of chance
  - Life only comes from life... it is a scientific fact that only living things can reproduce themselves... things would have had difficulty evolving...things don't get more complex they fall apart over time...
  - (The Hebrew translation "created" in Genesis 1:1 denotes the creation out of nothing of the marvelous, intricately designed systems of the universe.)

Charles Darwin popularized the theory of evolution

## 1. Evolution is Not a Fact

If evolution was a FACT we would see

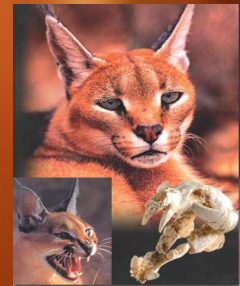

1. Proof of the mechanism, how it happened
2. Transitional forms...things that descended from one another
3. Genetic structures with evolutionary family relationship
4. Family trees showing that structures became more complex
5. Mutations would be found in the fossil record or observed in experiments

## 2. There are no transitions

There are no transitional fossils, therefore the fossil record does not prove evolution

The missing link is still missing...

There are no beneficial mutations

Ancient skeletons show there were complex life forms with exactly the same appearance and physical structures that they display today.

### THE NEANDERTHAL: A HUMAN RACE

This flute, made by Neanderthal man, shows that they used the seven-note scale that constitutes the form of Western music.

This needle is another proof that Neanderthal man was no different from present-day human beings.

Neanderthal footprints

## 2. No transitions...

One supposed transition ... Neanderthal Man was an ancient man that is believed to be totally human

## 2. No transitions...

Many, many "ancient" or "pre-historic man turned out to be false...

Hoax: Piltdown Man

Adaptation is change within a species

DECLASSIFIED IN 1953

### 3. Age dating is not accurate for millions of years

- It is an educated guess based on assumptions of how much  $^{14}\text{C}$  was in the organism when it died. It gets less over time.
  - Most common types of dating
    - Carbon 14
    - Potassium-argon
    - Uranium-lead
  - Interpretation of past events is in question
  - Assumptions are made based on the interpretation
  - It is hard to determine how much Carbon 14 was in the creature when it died

### 3. Age Dating

Carbon-14 is present in nearly every sample tested worldwide

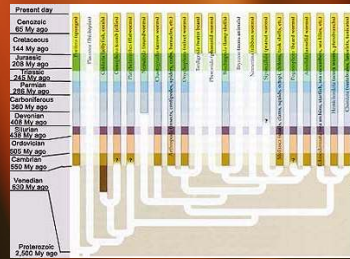

The earth experienced a global flood catastrophe which laid down most of the rock strata and fossils

Many people falsely believe that radiometric dating methods have proven the world to be billions of years old.

Dr. Williard Libby the founder of carbon-14 assumed a constant ration over time...it is not...which would throw off the results of how old the earth is...

### 4. Geologic column has problems...out of place layers

### 4. Geologic column has problems...out of place layers

Grand Canyon

### 5. Living Fossils

- Fossilized "critters" that are age dated as millions of years old often look very much like critters still alive today.
- No signs of evolutionary change

### 5. Living Fossils

- Well preserved fossils appear in amber. Fossils in amber came about clear sap or resin is secreted by trees

## 5. Living Fossils

- Fossilized “critters” that are age dated as millions of years old often look very much like critters still alive today.
- No signs of evolutionary change
